The Advance Xitanium range of linear LED drivers is designed to provide OEMs with ultimate flexibility. These models are compatible with standard 0-10V dimming systems to deliver reliably smooth dimming performance down to a minimum of 1%. Enabled with SimpleSet technology, these drivers offer the needed flexibility and performance for the application with precise tuning of drive currents, selectable dimming curves and adjustable minimum dimming levels. With wide operating windows, slim profile and simple current adjustability, the drivers make it easy for luminaire manufacturers to design linear fixtures with desired lumen levels to suit the application.

Operating window

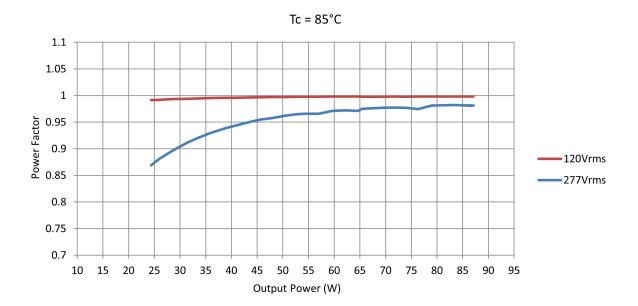

- Factory default output current is 1.4A.
 To get a 100% to 1% dimming range, the output current setting through AOC should be ≥ 0.7A.
 Factory default minimum dimming is 1%. This can be adjusted between 1% and 100% using Advance MultiOne.
